KEVIN HERNANDEZ-NINO

COMPUTER ENGINEER

346.465.0898 | klhn2312@gmail.com | linkedin.com/in/kevinlhn | www.kevinlhn.com

BACKGROUND

Versatile and detail-oriented engineer with a strong foundation in computer engineering and significant experience in designing, implementing, and testing complex systems. Skilled in technical solutions, documentation, and cross-functional collaboration. A team player committed to delivering results on mission-critical projects.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING, MINOR IN MATHEMATICS | GPA: 3.3
Walla Walla University, 2019 – 2023

- Relevant *Hardware* coursework: Computer Architecture, Computer Networks and Embedded System Design.
- Relevant *Software* coursework: Computer Org. and Assembly Language, Software Engineering, and Sequence and Parallel Data Structures and Algorithms.

EXPERIENCE

HANFORD MISSION INTEGRATION SOLUTIONS | COMPUTER ENGINEER
Richland, WA | 2023 – Present

- Utilized advanced engineering tools and software to design, implement, and maintain complex security systems, ensuring functionality and reliability across various applications.
- Created detailed plans, technical reports, and designs that adhere to rigorous engineering standards for mission-critical projects.
- Provided technical expertise in the installation, testing, and maintenance of integrated systems, supporting optimal performance and system integrity.
- Collaborated effectively with cross-disciplinary teams to coordinate project activities and align them with organizational objectives.
- Contributed to documentation and subcontracting efforts, ensuring clarity and compliance with all project requirements.

PACIFIC COMPUTER TECHNOLOGIES | SOFTWARE ENGINEER INTERN
Remote | 2022 – 2023

- Collaborated on developing key features for a housing management system, improving user experience and performance.
- Assisted in building responsive front-end components using React, enhancing UI accessibility.
- Conducted testing and debugging to ensure system reliability and security.
- Contributed to documentation and system architecture for future development and worked with senior engineers to meet project deadlines and milestones.

WALLA WALLA UNIVERSITY | RESIDENT DEAN
College Place, WA | 2019 – 2023

- Managed a residential community of over 400 students, ensuring a safe, inclusive, and engaging living environment.
- Collaborated with university staff and faculty to support student success, coordinating academic resources, and providing academic advising.
- Led a team of resident assistants, providing training, supervision, and support to ensure effective community building and conflict resolution.
- Implemented student conduct policies and procedures, promoting accountability and responsible behavior within the residential community.

SKILLSET

PROGRAMMING LANGUAGES
Phyton, Java, C++, Swift
JavaScript (ES6+), TypeScript
Shell Scripting (Bash, Zsh)

FRONT-END DEVELOPMENT
HTML5, CSS3, SASS/SCSS
React.js, Angular, Vue.js
DOM Manipulation, Fetch API

BACK-END DEVELOPMENT
RESTful API Development
Node.js, Express.js
MVC Architecture

DATABASES
MySQL, PostgreSQL
MongoDB, Firebase
Database Design
Query Optimization

VERSION CONTROL
Git, GitHub, GitLab
CI/CD Pipelines

CLOUD & DEPLOYMENT
AWS, GCP, AZURE
Docker

ENGINEERING TOOLS
AutoCAD (2D Modeling)
SolidWorks (3D Modeling)
MATLAB (Simulation)

OTHER SKILLS
Fluent Spanish

SW PROJECTS

PERSONAL PORTFOLIO WEBSITE
Created a dynamic portfolio to showcase skills and projects.

HOUSING MANAGEMENT PWA
Created a PWA for a housing management system for universities.

RECIPE AI APP
Built an AI-powered app that suggests recipes based on user-input ingredients.

WEATHER APP
Created a weather app using the OpenWeather API for real-time data and forecasts.
